Ayer's Cherry Pectoral,

or Diseases of the Throat and Lungs,
such as Coughs, Colds, Whooping
Cough, Bronchitis, Asthma and
Consumption.

The few compositions,
which have won the con-
fidence of mankind and be-
come household words,
among not only one but
many nations, must have
extraordinary virtues—
perhaps no one ever so-
bered so wide a reputa-
tion, or maintained it so
long, as AYER'S CHERRY
PECTORAL. It has been
known to the public about
forty years, by a long con-
tinued series of marvellous
cures, that have won for
it a confidence in its virtues
never equalled by any
other medicine. It still makes
the most effective and
valuable remedy for the
cure of Coughs, Colds, and
Asthma, and is a most ef-
fectual remedy for the
cure of Whooping Cough,
Bronchitis, and Asthma.
It is a most valuable
remedy for the cure of
all the diseases of the
throat and lungs, and is
a most valuable remedy
for the cure of all the
diseases of the chest.

WHOLE NO. 726.

PHYSIOLOGY OF MILK PRODUCTION.

NUMBER ONE.

From the earliest history of the race, milk has been universally used as an article of food, and, coupled with honey, has frequently been used as a symbol of excellence and abundance. Though the cow of the bovine genus of animals has been mostly relied on for the production of milk for human food, yet with many nations and tribes, the milk of a variety of other animals is used. The Bedouins and Tartars of Central Asia, use the milk of mares, and the Arab of the desert relies chiefly on the milk of his camel for food during long journeys. In Switzerland and southern Europe the milk of goats is extensively used for food, and is manufactured into cheese, and exported to various parts of the world. In France large flocks of sheep are kept for their milk.

The production of milk is the special function of the female of that large class of animals known as mammalia; which embraces a large portion of all land animals known, except birds and reptiles. Nature's special object in its production, is the nourishment of its young; and no food can be substituted for this class of animals that contains the proper nutritious elements so nicely combined, as this bland and healthful fluid.

The mammary gland, whose special function is its production, is composed of an immense number of peculiar cells, each cell having a duct which connects it with other cells and ducts, which uniting form larger ducts, and all converging towards the teat. The secretion of milk, like all other secretions, is a vital process; and as such is beyond our ken. As yet the learned scientist is unable to explain the vital process, whereby the various animal products are formed. We cannot tell how or why, from the blood, one gland secretes tears, another bile, another saliva, and another milk. The most that we can show is the anatomy of the glands and some of the conditions that affect favorably or unfavorably the quantity or quality of the secretions.

Early after impregnation there is an enlargement of the mammary gland. The development continues during the entire term, until the young is brought forth, when it is fully ready to furnish nutriment for the offspring. But as yet no milk has been formed. The gland, (or udder as it is called in the cow) is at this period in a highly congested state, being charged with blood to its fullest capacity.

The udder does not act as a reservoir to contain the milk; but as a machine to separate, or change the blood into milk. The natural stimulus to the gland, to induce it to perform its peculiar function is the presence of the calf; next to this is the presence and gentle manipulations of a kind mother. The formation or the making of the milk is in no sense under the control of the will; but rather of the emotions. The instinctive loving desire of the mother to feed her young, is in itself the most favorable condition of mind for milk production. Innocent, well meaning cows are often charged with being angry, and will fully "holding up" their milk, when the real cause is the brutal and abusive treatment they have received, which has so irritated and excited the nervous system as to make it impossible to respond even to the demand of their young, or the milk. All causes of whatever kind which exhaust the vital forces of the animal, materially limit the quantity, and change the quality of the milk. Cows that are exposed to driving winds, cold and storms, produce not only less milk, but their milk contains less butter; because the oleaginous portion has been taken up by the respiratory process in the effort of nature to keep warm. Cows that are driven far to pasture, or have to make considerable muscular effort, by feeding on hills, give milk that is defective in butter, but abundant in casein or cheese. So on the other hand, cows that are well fed, make little muscular effort, are kindly treated and kept warm make more butter and less cheese. Dairy farmers should carefully study all the physiological conditions which influence the production of milk; for to a great extent, the profit or loss resides in the attention or negligence of these conditions.

VEGETINE
PURIFIES THE BLOOD AND RESTORES
THE HEALTH.

SEVENTY-ONE YEARS OF AGE.

EAST MANSFIELD, Aug. 22, 1873.
Mr. STEVENS—Dear Sir: I am seventy-one years
of age; have suffered many years with Kidney
Complaint, and weakness in my back, and
was induced by friends to try your VEGETINE,
and think it the best medicine for weakness of the
Kidneys I ever used. I have tried many remedies
for this complaint, and never found so much relief
as I do from your VEGETINE. It strengthens and
invigorates the whole system. Many of my acquaint-
ances have taken it, and all are well and strong.
I feel that I am a new man, and I feel that I am
able to do all the work I wish to do.
Yours truly,
JOSEPH H. SHEPARD.

A Source of Great Anxiety.

My daughter has been receiving great benefit
from the use of VEGETINE. Her declining health
was a source of great anxiety to all of her friends,
and the use of VEGETINE restored her health,
strength and appetite.
N. H. TILDEN,
Insurance and Real Estate Agent, No. 49 Sears
Building,
Boston, Mass., June 5, 1872.

Recommend it Heartily.

SOUTH BOSTON, Feb. 7, 1873.
Mr. STEVENS—Dear Sir: I have taken several
bottles of your VEGETINE, and am convinced it is
a valuable remedy for Dyspepsia, Kidney Complaint,
and general debility of the system. I can heartily
recommend it to all suffering from the above com-
plaints.
Miss MURPHY PARKER, 386 Atlantic street.

WHAT IS NEEDED.

BOSTON, Feb. 13, 1871.
Mr. H. R. STEVENS—Dear Sir: About one year
since I found myself in a feeble condition from
general debility. VEGETINE was strongly recom-
mended to me by a friend who had been much
benefited by its use. I procured the article and
used it according to the directions. It has been
discontinued by me. I feel quite confident
that there is no medicine superior to it for the
complaints for which it is especially prepared, and
would cheerfully recommend it to those who feel
that they need something to restore them to per-
fect health.
Respectfully yours,
U. L. PETTINGILL,
Firm of S. M. Pettengill & Co., 10 State St., Boston.

Factory, where he will keep on hand
and for sale a large supply of

HARD AND SOFTWOOD

By the BUNCH, WUNDLE or CORD, at reasonable
prices. Customers supplied at the shortest notice.

Prospectus for 1874--7th Year.

The Aldine,

An illustrated Monthly Journal, universally ad-
mitted to be the handsomest Periodical in the
World. A Representative and Champion
of American Taste.

Not for Sale at Book or News Stores.

THE ALDINE, while issued with all the regularity,
has none of the temporary or faintly interest-
characteristic of ordinary periodicals. It is an
elegant miscellany of pure, best and graceful litera-
ture, and a collection of pictures, the rarest speci-
mens of artistic skill, in black and white. Al-
though each succeeding number affords a fresh
pleasure to its friends, the real value of the
work is in the fact that it is a complete and
exhaustive encyclopedia of the best and most
valuable of the human mind. It is a complete
encyclopedia of the best and most valuable of
the human mind. It is a complete encyclopedia
of the best and most valuable of the human
mind. It is a complete encyclopedia of the
best and most valuable of the human mind.

ART DEPARTMENT, 1873.

The illustrations of THE ALDINE have won a
world-wide reputation, and in the art centres
of Europe it is an admitted fact that its wood cuts
are examples of the highest execution ever attained.
The common prejudice in favor of "steel plates"
is rapidly yielding to a more educated and
refined taste, which recognizes the advantages
of superior artistic quality with greater facility
of production. The contents of THE ALDINE
possess all the delicacy and elaborate finish of
the most costly steel plate, and yet, in the hands
of the artist, they are a better rendering of the
artist's original.

To fully realize the wonderful work which THE
ALDINE is doing for the cause of art culture in
America, it is only necessary to consider the cost
of the people of any other recent representations
of the productions of great painters.

In addition to the members of the National
Academy, and other noted American artists,
THE ALDINE will reproduce examples of the
best foreign masters, with a view to the highest
artistic success and greatest general interest.
Thus the ALDINE will, at a trifling cost, enjoy in his own home the
pleasures and refining influences of true art.

The quarterly issue for 1874 will be by
Thos. Moran and J. D. Woodworth.
The Christmas issue for 1874 will contain special
designs appropriate to the season, by our best
artists, and will surpass in attractions any of its pre-
decessors.

PREMIUM FOR 1874.

Every subscriber to THE ALDINE for the year
1874 will receive a pair of Chromos. The original
chromos are published in oil for the publisher of
THE ALDINE, by Thomas Moran, whose great
Colorado pictures were purchased by Congress for
ten thousand dollars. The subjects were chosen
to represent "The East" and "The West." One
is a view of the White Mountains, the other a
view of the Cliffs of Green River, Wyoming Territory.
The subjects are of a high artistic quality, and
afford a good display of the artist's scope and
coloring. The chromos are each worked from
three distinct plates, and are in size (12x16) and
appearance are equal to the original. The quality
of the reproduction is of a high artistic quality,
and the successful realization is attested by
the following testimonials, over the signature of
Mr. Moran himself.

NEWARK, N. J., Sept. 20th, 1873.
MESSRS. JAMES SUTTON & CO., Publishers,
26 Maiden Lane, New York.
Gentlemen—I am delighted with the proof in
color of your chromos. They are wonderfully suc-
cessful representations by mechanical process of
the original paintings.

(Signed) THOS. MORAN.
These chromos are in every sense American.
They are by an original American process, with
material of American manufacture, from design
of American scenery by an American painter, and
presented to subscribers to the first successful
American Art Journal. If no better because of all
this, they will certainly possess an interest not
foreign production can inspire, and neither are
they any the worse by reason of peculiar facilities
of production they cost the publishers only a trifle,
while equal in every respect to the original. I feel
that I can safely recommend them to my friends,
and will send you a pair of the chromos if you
will send me the subscription price of THE
ALDINE. Persons of taste will prize these pic-
tures for themselves—not for the price they did,
or did not cost, and will appreciate the enterprise
that renders their distribution possible.

If any subscriber should indicate a preference
for a figure subject, the publishers will send
"Thoughts of Home," a new and beautiful chromo
tapesty, representing a little Italian exile
whose speaking eye betrays the longing of his
heart.

For 50 cents extra, the chromos will be sent,
mounted, varnished, and prepaid by mail.

THE ALDINE will hereafter, be obtained only
by subscription. There is no retail sale, and the
rate; each for subscriptions must be sent to the
publishers direct, or handed to the local canvasser,
whenever the canvasser is given, bearing the fac-
simile signature of JAMES SUTTON & CO.

Any person wishing to act permanently as local
canvasser will receive full and prompt information
by applying to

JAMES SUTTON & CO., Publishers,
26 Maiden Lane, New York

THE NEW YORK TIMES.

Daily, Semi-Weekly, and Weekly.

THE NEW YORK DAILY TIMES.

IS THE
ONLY REPUBLICAN JOURNAL IN THE
CITY OF NEW YORK.

The character which THE DAILY TIMES has
borne in the past is a sufficient guarantee for its
conduct in the future. It will continue to advo-
cate the cause of the people, without reference to
the interests of individuals. No expense will be
spared in the maintenance of its position as the
foremost of the best foreign correspondence, and
the largest staff of home correspondents. All ob-
jectable news and advertisements are rigidly ex-
cluded.

TERMS TO MAIL SUBSCRIBERS.

The DAILY TIMES, per annum, including the
Sunday Edition, ten cents for each copy ad-
ditional to the above rates.
The Sunday Edition, per annum, 10 " "

Semi-Weekly Times contains a very care-
ful epitome of our foreign and home correspon-
dence; an interesting selection of current litera-
ture from the best foreign and domestic maga-
zines; a choice variety of agricultural matter, and
the very latest news up to the hour of going to
press. Terms—\$3 per annum. Club rates—Two
copies, one year, \$5; Three copies, one year, \$7;
and extra copies at half price. For every copy
added to clubs at any time during the year, at
club rates.

Club rates of THE WEEKLY—All to one Post Office
address—Five copies, per annum, \$1.50; Ten
copies, per annum, \$2.50; Twenty copies, per
annum, \$4.50; Thirty copies, per annum, \$6.50;
and extra copies at club rates. For every copy
added to clubs at any time during the year, at
club rates of the WEEKLY.

When the names of subscribers are required to
be written upon each copy of the paper, and sent
to the Post Office address, ten cents for each copy ad-
ditional to the above rates.

The SEMI-WEEKLY and WEEKLY mailed one year
to clerical men at the lowest rates.

These rates are in advance. Remit in drafts on
New York or Post Office Money Orders, if possible,
and where neither of these can be procured send
money in a registered letter.
